## SKILLS SUMMARY

**languages:** java, C# ,javaScript ,Dart,Typescript,SQL,python  
**Tools:** MySQL ,SQLite ,PostgreSQL ,Postman , insomnia, GitHub, Linux  
**soft skills :** Excellent communication, Problem solving skill, Adaptation to Environment

## PROFESSIONAL EXPERIENCE

### Full stack webDeveloper

NovaComputech (Internship)

- Developed and tested a RESTful API for a new product line, integrating it with frontend components to ensure seamless user experience.
- Optimizing the existing API endpoints by implementing caching strategies and asynchronous processing improving overall system performance .
- Streamlined the API testing process using Postman and Insomnia, and contributed to frontend testing workflows to reduce manual QA time across the stack.

### Backend Developer(Node js /TypeScript)

NovaComputech (full time 2023–2024)

- Developed and testing a RESTful API a new product line.
- Optimizing the existing API endpoints by implementing caching strategies and asynchronous processing improving overall system performance .
- Automated API testing process using Postman and Insomnia , reducing manual testing time .
- Improved overall system performance by optimizing API endpoints through caching strategies and asynchronous processing, while also enhancing frontend responsiveness.

### Yod Technologies (.Net and React.js Developer) | 2025–present

#### CONTRACTUAL

- building scalable code and production ready Apis for ERP web app
- integrating the front end with backend Apis using react query
- Integrating AI in the projects for automation
- Scram master (for the Admin module)

### Next.js | TypeScript Developer forntend | 2025– aug 12

(part time)

- Writing clean, maintainable, and scalable TypeScript code.
- beauty salon resurving app
- Developing responsive and user-friendly UI with Next.js and tailwind.
- Collaborating with designers and backend developers to deliver seamless end-to-end solutions.

## **Freelancing mobile and web Developer**

- Worked on various web and mobile projects for clients, focusing on full-stack development with React, Node.js, Express.js, Nest.js and Flutter.
- Fast delviring products while ensuring the quality and scalblity
- Integrating AI in the projects

## **MY PROJECTS**

### **Navigo Ride Hailing and delivery app (freelancing)**

(Backend developer | Nest.js Typescript) link:<https://github.com/Goftanbon> | Play Store and Appstore

- Developed and maintained backend services using Nest.js (TypeScript) for a ride-hailing and delivery platform, ensuring scalability and high performance.
- Implemented real-time notification system using Firebase Cloud Messaging (FCM) to deliver instant updates to drivers, riders, and delivery agents.
- Ensured secure authentication with JWT and role-based access control for drivers, riders, and admins.
- Focused on fast product delivery while maintaining high code quality, scalability, and performance.
- Built RESTful APIs for user authentication, ride booking, delivery management, and transaction tracking.

### **Mount skill – Online learning platform (Novacomputech)**

(Fullstack developer | Node.js (express.js)) link:[mountskills.com](https://mountskills.com) /<https://github.com/Goftanbon>

- Designed and developed a full-featured online learning platform enabling students to access courses, track progress, and interact with instructors.
- Built and optimized RESTful APIs using Node.js and Express.js for user management, course creation, enrollment, and content delivery.
- Implemented secure authentication and authorization using BetterAuth.
- Developed admin and instructor dashboards to manage courses, users, and analytics.
- Integrated MongoDB for scalable data storage and efficient querying of course, user, and progress data.

### **Ethio-Delivery- Delivery App (freelancing)**

(Backend developer | Nest.js Typescript) link:<https://ethiodelivery.com/> | <https://github.com/Goftanbon>

- Developed a robust backend using Nest.js (TypeScript) for managing real-time delivery operations including order creation, tracking, and status updates.
- Integrated Firebase Authentication to handle secure user sign-up, login, and role-based access for customers, drivers, and admins.
- Built RESTful APIs following clean architecture principles to ensure scalability and maintainability.
- Utilized PostgreSQL with TypeORM for structured relational data management and optimized query performance.
- Ensured secure API communication and robust error handling across all backend modules.

### **EthioBestPrice – E-commerce App (freelancing)**

(Backend developer | Nest.js Typescript) link:<https://ethiobestprice.com> | <https://github.com/Goftanbon>

- Built a scalable backend architecture using Nest.js (TypeScript) to power product listings, orders, and payment workflows.
- Integrated Firebase Authentication for secure user login, signup, and role-based access for buyers, sellers, and admins.
- Developed RESTful APIs to manage products, categories, carts, orders, and user profiles.

- Implemented real-time notifications using Firebase Cloud Messaging (FCM) for order confirmations and delivery updates.

### **BossBingo - BingoGame (freelancing)**

(fullstack developer | .net | React.js) link:<https://bossbingoet.com/> | <https://github.com/Goftanbon>

- Designed and developed an interactive online Bingo game platform enabling users to play in real time with multiplayer support.
- Built a robust backend using .NET for game logic, player management, scoring, and session handling.
- Developed a responsive frontend with React.js, providing dynamic gameplay, smooth animations, and real-time state updates.
- Focused on performance optimization, clean architecture, and scalable design to support large concurrent user sessions.

### **ShegerBingo(telegramBot) - BingoGame (freelancing)**

(Backend developer | python ) <https://t.me/ShegerBingooBot> | <https://github.com/Goftanbon>

- Developed a Telegram-based Bingo game bot using Python, allowing users to join, play, and track games directly within Telegram.
- Integrated the Telegram Bot API to handle real-time user interactions, game commands, and automated responses.
- Implemented game logic and state management for player sessions, score tracking, and winner validation.
- Focused on reliability, performance, and seamless gameplay through optimized message handling and async operations.

### **Betlehulu house rental - Webapp(personal Project)**

(Backend developer | Node.js (express.js)) link: <https://github.com/Goftanbon>

- Built a complete backend system for a house rental platform connecting landlords, renters, agents, and notaries.
- Developed RESTful APIs for property listings, contracts, payments, and user role management (Landlord, Renter, Agent, Notary, Admin).
- Integrated Chapa Payment Gateway for handling online transactions and commission-based split payments.
- Added support for digital contract signing, schedule management, and complaint handling workflows.
- Ensured code scalability, maintainability, and robust error handling across all backend modules.

### **Beauty salon reservation app - Webapp(parttime)**

(frontend developer | Next.js / TypeScript) link: <https://github.com/Goftanbon>

- Developed a responsive and SEO-friendly frontend using Next.js, enabling clients and stylists to manage appointments and services efficiently.
- Built dynamic booking interfaces with real-time updates for available time slots, appointment confirmations, and service management.
- Integrated Firebase Authentication for secure login and role-based access for clients, stylists, and admins.
- Focused on performance optimization, clean UI/UX design, and cross-device responsiveness.
