

GOFTANBON KENO WAKJIRA

Full Stack Developer | React · Next.js · Node.js · NestJS · TypeScript

Addis Ababa, Ethiopia | +251 901 057 329 | goftanbonkeno@gmail.com | linkedin.com/in/goftanbon-keno-me | github.com/Goftanbon

SUMMARY

Full Stack Developer with 3+ years of experience delivering production systems across gaming, delivery, e-commerce, and enterprise platforms, working on both backend services and frontend applications. Backend engineer on Ethiopia's National Lottery game platform processing 2M+ transactions per day across 5+ game providers, and full-stack contributor on ERP, ride-hailing, and booking applications using React, Next.js, Node.js, NestJS, and .NET Core. Comfortable owning features end-to-end: REST API design, PostgreSQL/MySQL/MongoDB, responsive UI development with React/Next.js and Tailwind CSS, authentication (JWT/OAuth/Firebase), Docker, AWS/Azure, and CI/CD.

Portfolio & project details: github.com/Goftanbon

SKILLS

Languages: TypeScript, JavaScript, C#, Go, Python, Java, SQL

Frontend: React.js, Next.js, Tailwind CSS, responsive UI development, SEO-friendly rendering

Backend Frameworks: NestJS, Express.js, Node.js, .NET Core, Gin, FastAPI, Django

Databases & Caching: PostgreSQL, MySQL, MongoDB, Redis · ORMs: Prisma, TypeORM

Auth & Security: JWT, OAuth, role-based access control (RBAC), Firebase Auth, secure webhooks, API rate limiting

Messaging & Events: NATS, Redis Pub/Sub, publisher/consumer architecture, Firebase Cloud Messaging

Cloud & DevOps: AWS (EC2, Lambda, RDS, S3), Azure, Docker, Nomad, Grafana, PM2, Linux, Git/GitHub, CI/CD

Practices: RESTful API design, full-stack feature delivery, microservice-style architecture, unit & integration testing, Agile/Scrum, code reviews

EXPERIENCE

Backend Engineer | Tamcon Software Solution

Nov 2025 – Present

- Engineer core services for the Ethiopian National Lottery game platform processing 2M+ transactions per day across 5+ third-party game providers, managing player wallets and game sessions.
- Cut average API response times by ~40% under peak traffic by introducing Redis caching and query optimization; integrated 5 payment gateways with secure, idempotent payment workflows.
- Own architectural decisions for the Tamcon Game Manager platform, defining service boundaries and integration patterns; AWS infrastructure sustains 99.9% uptime.

Stack: Node.js, TypeScript, Redis, PostgreSQL, Prisma ORM, Docker, AWS, Grafana, Nomad

Full Stack Developer (.NET Core & React) | YoD Business Solution

Jun 2025 – Nov 2025

- Led full-stack development of enterprise ERP and Student Management Systems; built and optimized a React-based web application for ERP Light, deployed across multiple industrial enterprises.
- Designed backend APIs using .NET Core hosted on Azure, and mentored junior developers through technical design reviews.

Stack: C#, .NET Core, React.js, Azure, REST APIs

Frontend Developer (Part-time) | Beauty Salon Reservation App

2025

- Built a responsive, SEO-friendly booking frontend in Next.js/TypeScript with real-time time-slot updates and Firebase-authenticated role-based access.

Stack: Next.js, TypeScript, Tailwind CSS, Firebase Auth

Backend Developer (Contract) | Navigo — Ride-Hailing & Delivery App

Feb 2025 – Jun 2025

- Developed the NestJS (TypeScript) backend for a ride-hailing platform live on the Play Store and App Store, covering ride booking, delivery, and transaction tracking, with JWT auth and RBAC.
- Contributed frontend work on the Next.js admin panel used to manage rides, drivers, and platform operations.

Stack: NestJS, TypeScript, Next.js, JWT, RBAC, Firebase Cloud Messaging

Backend Developer (Contract) | Ethio Delivery & EthioBestPrice

Jun 2024 – Feb 2025

- Built event-driven NestJS backends (NATS, Redis Pub/Sub, PostgreSQL/TypeORM) for a delivery platform and a scalable e-commerce backend for product, order, and payment workflows.

Stack: NestJS, TypeScript, PostgreSQL, TypeORM, NATS, Firebase Auth

Backend Developer (Node.js / TypeScript) | NovaComputech

2023 – 2024

- Shipped RESTful APIs for a new product line, improving endpoint performance by ~30% and cutting manual testing time by ~50% through automated Postman/Insomnia test suites.

Stack: Node.js, Express.js, TypeScript, REST APIs

EDUCATION

BSc in Computer Science — St. Mary's University

2020 – 2025 · CGPA 3.34 · Best Thesis · Languages: English, Amharic, Afaan Oromo

CERTIFICATES

- JavaScript React.js — Col John Robinson (American Center)
- Introduction to Machine Learning — Google
